Transactions arrive. Private hashlocks clear.

32 nodes · 96 trustlines · 1,000 random offers · seed 601 · local-filter followup

Neighbour-private message contents · no network-wide coordinator · actual SHA-256 hashlocks

[1] Offline, quote-consistent reference. Gross debt includes debt that cannot be cleared in loops.

Finite-window research run with honest peers and reliable delivery; complete clearing is not guaranteed.
